

## ABI MOBILRAM TM22

Terra's ABI MOBILRAM TM22 is efficient and extremely versatile. The MOBILRAM offers a variety of attachments allowing us to provide installation options that others can't. The large TM22 has the ability to handle 70' long sheets, minimizing the need for splices. It also has the ability to mount a hydraulic press onto the machine for use in areas where no vibration is allowed. The ABI is one more example of Terra's commitment to invest in equipment and techniques that provide quicker and more cost-efficient installation methods.

### Why Terra?

- More than *45 Years* of experience
- *Union* contractor
- *Professional Engineers* with a wide range of design/build deep foundation experience
- The *experience* needed to provide the most cost effective and technically sound foundation support *solutions* for any project
- Numerous equipment *options* to provide the most cost-efficient installation

### Why the ABI MOBILRAM?

- Extremely *fast* pile and sheet installation. Ability to adjust frequency to soil type to increase speed.
- High frequency vibration *minimizes* the potential for damage to surrounding structures
- Self-leveling and lofting makes for an easier and more *accurate* alignment
- High extraction force for pulling difficult beams and sheeting
- On-board Control System *ensures* alignment, depth, pressure, and feed force
- Camera monitoring of the jaws and chain attachments on the head make grabbing a sheet or pile quick and *safe*
